INDEX

Sl.No.	Program Title	Page No.	Signature
1.	Write the sample program to print a different greeting, for example, "Good Day!"	03-04	
2.	Write a console application that prints your first and last name on the console.	05-06	
3.	Write a program that prints the following numbers on the console: 1, 101, 1001, each on a new line.	07-08	
4.	Write a program that prints on the console the current date and time.	09-10	
5.	Write a program that prints the square root of 12345	11-12	
6.	Write a program that prints the first 100 members of the sequence 2, -3, 4, -5, 6, -7, 8.	13-14	
7,	Write a program that reads your age from the console and prints yourage after 10 years	15-16	

1. Write the sample program to print a different greeting, for example, "Good Day!"

Code:

```
using System;
```

```
class Program
```

```
{
```

```
    static void Main()
```

```
    {
```

```
        Console.WriteLine("Good Day!");
```

```
    }
```

```
}
```

Output:

Good Day!

2. Write a console application that prints your first and last name on the console.

Code:

```
using System;
```

```
namespace PP2
```

```
{
```

```
    internal class Program
```

```
    {
```

```
        static void Main(string[] args)
```

```
        {
```

```
            string firstName = "Kalpa";
```

```
            string lastName = "shree";
```

```
            // Print to console
```

```
            Console.WriteLine("First Name: " + firstName);
```

```
            Console.WriteLine("Last Name: " + lastName);
```

```
        }
```

```
    }
```

```
}
```

Output:

First Name: Kalpa

Last Name: shree

**3. Write a program that prints the following numbers on the console:
1, 101, 1001, each on a new line.**

Code:

```
using System;
```

```
class Program
```

```
{
```

```
    static void Main()
```

```
    {
```

```
        Console.WriteLine(1);
```

```
        Console.WriteLine(101);
```

```
        Console.WriteLine(1001);
```

```
    }
```

```
}
```

Output:

1

101

1001

4. Write a program that prints on the console the current date and time.

Code:

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;

namespace PPro4
{
    internal class Program
    {
        static void Main(string[] args)
        {
            Console.WriteLine("Current Time: " +
DateTime.Now.ToShortTimeString());
            Console.WriteLine("Current Date: " +
DateTime.Today.ToString());
        }
    }
}
```

Output:

Current Time: 14:03

Current Date: 12-03-2026 00:00:00

5. Write a program that prints the square root of 12345

Code:

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;

namespace PP5
{
    internal class Program
    {
        static void Main(string[] args)
        {
            double number = 12345;
            double result = Math.Sqrt(number);

            Console.WriteLine("Square root of " + number + " is: " + result);

        }
    }
}
```

Output:

Square root of 12345 is: 111.108055513541

6. Write a program that prints the first 100 members of the sequence 2, -3, 4, -5, 6, -7, 8

Code:

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;

namespace PP6
{
    internal class Program
    {
        static void Main(string[] args)
        {
            for (int i = 2; i < 102; i++)
            {
                if (i % 2 == 0)
                    Console.Write(i + " ");
                else
                    Console.Write(-i + " ");
            }
        }
    }
}
```

Output:

2 -3 4 -5 6 -7 8 -9 10 -11 12 -13
14 -15 16 -17 18 -19 20 -21 22 -
23 24 -25 26 -27 28 -29 30 -31
32 -33 34 -35 36 -37 38 -39 40 -
41 42 -43 44 -45 46 -47 48 -49
50 -51 52 -53 54 -55 56 -57 58 -
59 60 -61 62 -63 64 -65 66 -67
68 -69 70 -71 72 -73 74 -75 76 -
77 78 -79 80 -81 82 -83 84 -85
86 -87 88 -89 90 -91 92 -93 94 -
95 96 -97 98 -99 100 -101

7. Write a program that reads your age from the console and prints your age after 10 years

Code:

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;

namespace PP7
{
    internal class Program
    {
        static void Main(string[] args)
        {
            Console.Write("Enter your age: ");
            int age = int.Parse(Console.ReadLine());

            int futureAge = age + 10;

            Console.WriteLine("Your age after 10 years will be: " +
futureAge);
        }
    }
}
```

Output:

Enter your age: 20

Your age after 10 years will be: 30
